

SVHC/REACH Article 33 – PFAS/PFOS Statement

January 2026

Products affected: All products subject to requirement of an SDS

SDS for all product subject to this requirement can be found online at the URL:

<https://www.alliedhightech.com/support/sds>

As information is made available, Allied updates this statement only on an annual basis each calendar year or sooner when required by law.

SVHC

REACH Article 33 requires any supplier of an article containing Substances of Very High Concern (SVHC) above the threshold of 0.1% weight by weight to provide the customer with sufficient information to allow safe use of the article.

Information on SVHC in articles is currently based on the European Chemicals Agency (ECHA) 'Guidance on requirements for substances in articles' (Version: 4.0, June 2017) which can be found online at the URL:

<https://echa.europa.eu/candidate-list-table>

The following items contain SVHC threshold value above (>) 0.1%:

<i>Item No.</i>	<i>Description</i>	<i>Substance</i>	<i>CAS No.</i>
200-10004	Mold release spray, hot	1-bromopropane	106-94-5
200-10006	Mold release spray, PTFE	n-hexane	110-54-3

PFAS/PFOS

PFAS/PFOS are widely used, long lasting chemicals, components of which break down very slowly over time.

Because of their widespread use and their persistence in the environment, many PFAS are found in the blood of people and animals all over the world and are present at low levels in a variety of food products and in the environment.

There are thousands of PFAS chemicals, and they are found in many different consumer, commercial, and industrial products. This makes it challenging to study and assess the potential human health and environmental risks.

To some extent, due to the widespread use, it is likely that some of the products Allied sells contain these substances. Unfortunately not enough information, data or mitigation options are available that have allowed any government authority to establish a threshold of safety which will take years to determine.

Please direct any further clarification questions via email to: lab@alliedhightech.com

UN Regulations

As a US company, Allied complies with US laws and only with UN regulations recognized by the US Government.
